

Employee management system version 1.0 is a software system that will allow the Human Resource department of Pasadena Corporation, California to manage it's employees in a better way. When needed, it'll take just a few seconds to find out the background of an employee & his/her contribution to the organization. It'll also facilitate keeping all the records of employees, such as their date of hiring & date of leaving. So all the information about an employee will be available in a few seconds. It'll also make it very easy to generate statistical data or custom data, like finding a certain set of employees.

Overall, it'll make Human Resource Management an easier job for the Human Resource department of Pasadena Corporation

Functional requirements [?] The HR executives will be able to search according to all this information. [?] The HR executives will be given more powers (add/modify) than other users. Passwords will be encrypted. [?] It'll be ensured that the information entered is of the correct format. For example, name can't contain numbers. In case information in incorrect format is added, the user will be asked to fill the information again. Non-functional requirements [?] MindWorx Inc. will give the initial passwords to the users which can then be changed because of security concerns. [?] In case password is forgotten, a phone call to MindWorx Inc.

can be made to reset it. In that case, new password will be emailed due to security concerns
